SUMMARY

Design engineer with **4+ years** designing products and building them in code. I take work from Figma to production in **Next.js, React, TypeScript and Tailwind**, build design systems as tokens and components, and ship with accessibility and motion done properly. I have shipped **2 live products** I designed and built, including my own lending app, treeti: **72 people** signed up in its first three weeks. I also coded the front end of Nūring's web app on the design system I built.

EXPERIENCE

Lead Designer · Nūring

Jan 2025 – Present · Remote (Ontario, Canada)

Nūring makes a smart glove that reads grip to measure an athlete's effort, recovery and load, starting with baseball.

- Redesigned the web app for athletes, coaches and guardians and **coded its whole front end**, then worked with the backend engineers as they connected the APIs.
- Built the design system the code runs on: **62 components, 39 colour tokens and 14 full-page templates**, shared by every surface of the product.
- Turned grip signals into clear screens: a five-band score scale measured against each player's own baseline, with status colours that always come with a word.
- Prototyped interactions in Framer and wrote the specs engineering builds from.

Product / UI Designer · HoBeei

Apr 2022 – Dec 2025 · Remote

UI designer on a gamified free-cycling marketplace with a virtual currency and live bidding. I turned the founder's product concepts and sketches into the full UI.

- Designed live bidding and the virtual wallet with **every state**: active, won and lost, loading, empty and error.
- Built the Figma design system engineering worked from, and carried specs and assets through to shipped builds.

SELECTED BUILDS

treeti LIVE · MY OWN PRODUCT

usetreeti.xyz

Interest-free lending records between family and friends, with witnesses, repayments and reminders. Designed and built end to end in **Next.js and Supabase**. Launched 14 October 2026: **72 sign-ups, 23 agreements and ₦549,300 recorded** in three weeks; tester feedback simplified 8 flows within 10 days.

Portfolio and Playground LIVE

muwaffaq.pages.dev

My site, built in **Next.js, React and TypeScript** on Cloudflare. It includes **16 interactive UI experiments** in mobile, web and motion: a dashboard whose chart reshapes between ranges, a drag-to-reschedule calendar, a data table with bulk actions, a spring tuner and shared-element transitions. Every piece works with the keyboard and screen readers, meets WCAG AA contrast, and respects reduced motion.

SELECTED BUILDS, CONTINUED

PharmaQuest LIVE

pharmaquest.pages.dev

Gamified practice for the Canadian pharmacist qualifying exam (PEBC). **257 questions** with a rationale for every option, spaced repetition, streaks, XP and 12 badge series. Designed and built in **React, Vite and Tailwind**, with cloud save, on Cloudflare Pages.

Sarki Energy CLIENT · CORPORATE SITE

Case study

Mapped the brief into **31 page types** before designing, then shipped 26 in **Next.js on Cloudflare**, including a station locator and working enquiry and quote forms.

QuickPay design system CLIENT · FINTECH

Write-up

Rebuilt **105 inconsistent screens** as about 91 on one token system: 120+ variables in light and dark and 52 documented components, ready for engineers. Raised contrast to WCAG AA and specified motion with springs and haptics. A live demo of one component in light, dark and Arabic (right to left) runs on my site.

SKILLS

Front end	TypeScript, React, Next.js, Astro, Vite, Tailwind, modern CSS (container queries, CSS modules), Motion for React, Supabase, Cloudflare Pages and Workers
Quality	Accessibility to WCAG AA (keyboard, screen readers, contrast, reduced motion), responsive and mobile-first layouts, image and font performance, Playwright for checks
Design	Design systems and tokens, Figma (variables, components, Dev Mode), Framer, every-state design, motion specs, prototyping
Tools	Git and GitHub, Claude Code and Figma MCP, HyperFrames for launch films

EDUCATION

MSc Information Technology — Nigerian Defence Academy, Kaduna · 2024 – 2026

BSc Computer Science — Ahmadu Bello University, Zaria · 2016 – 2021

Live builds, the Playground and case studies: **muwaffaq.pages.dev**
